PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1c (DIA). The photographic analysis for this particular report was performed by the Production Center 1P1c.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

SUMMARY

A road-served ammunition supply installation with rail access covers approximately 645 acres 5 kilometers (km) west of Shepetovka Army Barracks Slavuta and 3 km west of the town of Slavuta (Figure 1). The area contains six administration/support buildings and 23 revetted or partially revetted ammunition storage buildings. A good internal road network affords the installation access to the barracks

area and to a rail spur leading from the Berdichev-Rovno rail line. Probable unloading facilities were observed at this rail spur with an access road leading to ammunition storage area. The area appears to be partially secured (Figures 2 and 3).

This installation was covered by [REDACTED] KEY-
HOLE missions between [REDACTED]

DESCRIPTION OF INSTALLATION

25X1D

Railroad Service

A single track rail spur to the installation and three 125- by 25-foot probable trackside docks (Area A, Figure 3), apparently provide loading and unloading facilities for the ammunition storage installation.

Administrative and Troop Housing Area

Area D (Figure 3) contains seven administration/support buildings which are probably used for general support of the supply installation.

Road Service

Unimproved probable earth roads service the area.

Ammunition Storage Area

Area F contains twenty-three 175- by 45-foot revetted ammunition storage buildings.
